Re: GM Massena Site - FOIA Request # EPA-R2-2014-002129 - Interim Response #2

Dear Chris,

As per my email earlier today, I'm glad you received the project sequencing map in response to item #1 of your revised request of 2/11/14.

As promised, here is the link to the RACER Trust's website which contains on-site air monitoring data (air quality and dust) from 2011 to 2013.

[http://racertrust.org/Environmental\\_Cleanup/Massena\\_Dust\\_Monitoring\\_Reports/](http://racertrust.org/Environmental_Cleanup/Massena_Dust_Monitoring_Reports/)

There are also a number of technical reports, maps, photos, weekly reports, etc. from the past 10 years available online on RACER's website, at:

<http://www.racertrust.org/Properties/Detail?Id=12000>

Next we will check with our contractors regarding what other data / reports may be responsive to your request.

Then we will check agency emails for anything responsive. Due to the search terms/volume, those may take a little longer to sort through.

Thanks for your patience,  
Marla
